

PROTECT YOUR QUALITY
WITH **OPTIMAL STORAGE**®

CUSTOM STORAGE & COOLING SYSTEMS

Do you want to optimize the storage of your product? Look no further than Omnivent! **We design and build custom storage and cooling systems** for traditional farmers, agricultural entrepreneurs, and the processing industry. Our systems are always tailored to your specific needs, depending on:

- ✓ **Your product, and your harvest and climate conditions**
- ✓ **Your available storage space (whether new or existing)**
- ✓ **Your storage goals and investment budget**

Contact your dealer or area manager for advice about optimizing your storage.

PERFECTLY CONTROLLED TEMPERATURE, HUMIDITY & CO₂

We deliver high-quality technology, so you can control the climate in your storage. From temperature to relative humidity and CO₂ concentration. This means you can store your product longer and optimize your sales opportunities and profits. Our systems are also designed to minimize energy consumption.

ENTIRE STORAGE SOLUTION

With Omnivent you have one point of contact for setting up your storage solution. From design to commissioning. We take care of everything:

- boxes
- condensation drying
- CO₂ refreshment
- ventilation
- humidity control
- weight control
- cooling
- energy management
- heating

STORING SUSTAINABLY, **TOGETHER**

We want to help you to keep food available, all year long. By providing custom-made storage solutions, and support during the entire cultivation and storage period.

For years we have been gathering as much knowledge as possible about storing arable and fresh produce, together with our customers. We apply that knowledge to provide you with an innovative solution that perfectly suits your storage process.

Guaranteeing product quality starts at cultivation, therefore Omnivent offers both storage advice and cultivation guidance. That is how we want to work with you on the availability and quality of food!

MONITOR & AUTOMATE EASILY IN REAL-TIME

The OmniCuro is our flagship storage computer. Do you know what is great about the OmniCuro? It has 3 functions that make storing easy:

- ① It **monitors and analyses** your store, such that you always know what's going on.
- ② It **controls** your store, making decisions for you based on your storage strategy.
- ③ It **advises** you, by automatically making the right settings based on some simple questions!

ALWAYS WITH YOU

You can use these functionalities anytime, anywhere. Using the OmniTouch screen in your storage, an app on your phone/tablet, or via your computer, all with the same user-friendly interface. And, because we develop the OmniCuro software ourselves, you get regular updates to make sure that you can always use the newest functionalities!
